▶ALEMANIA

SAP Business Objects expert* Location: Wiesbaden

What you can look forward to: You have already demonstrated your expertise in SAP BO and are searching for new challenges and opportunities to develop. You will be part of a team helping to shape our SAP BI landscape with BW 7.3 on HANA and Business Objects 4.0. As a skilled communicator, you will help our divisions and IT consultants to implement projects in the BI environment. Working on innovative SAP projects (roll-out of BO, GRC, Portal, CRM), you will extend your personal skill profile in terms of methodology and technology. Together with your team colleagues and our external service providers, you will also be in charge of the entire SAP infrastructure. Más info en: <http://goo.gl/iemvF9>

SAP Finance application developer* Finanzen

What you can look forward to: Are you searching the right springboard for your career? Our IT offers a stable and innovative working environment! You will join your team colleagues in supporting our divisions with regard to all accounting/financial reporting applications (German Commercial Code, International Financial Reporting Standards). Working on projects, you will help to design and develop viable solutions, shape our Finance application landscape (SAP FI, CO, AA, SAP BW 7.3 on HANA among other things) and continuously optimise existing processes. Specifically, you will help to ensure smooth operations, realise concepts from end to end (design, programming, customizing, testing, roll-out and documentation), select and implement

standard software and program the interfaces for connection of external systems. Más info en: <http://goo.gl/S5vEAW>

Electrical engineers/Computer Scientists (f/m) - Firmware Development

DESY is one of the worlds leading research centers for investigating the structure of matter. Located in the metropolitan area of Hamburg, Germany DESY uses its accelerators for photon science, particle and astroparticle physics as well as accelerator physics. That makes DESY not only a magnet for more than 3000 guest researchers from over 40 countries every year, but also a coveted partner for national and international cooperations. Here at DESY, creative and motivated minds from home and abroad will find challenging and ambitious tasks in an international environment.

Tasks: • Firmware development for radio frequency control systems • Programming of driver software for hardware operation in electronic crates • Software development for the automation and protection of high power amplifiers • Programming of high-speed

digital links and high-rate analog-to-digital convertes • Implementation of multiple-in-multiple-out feedback controllers in VHDL . Más info en: <http://goo.gl/js9d2A>

Electrical engineers/Computer Scientists (f/m) - Driver Software Dev.

Here at DESY, creative and motivated minds from home and abroad will find challenging and ambitious tasks in an international environment. Tasks: • Programming of linux driver software for hardware operation in electronic crates • Software development of feedback algorithm and automation controls • Development of generic driver interfaces to FPGA based electronic boards • Software integration of complex systems Requirements: • Degree in physics, electronic engineering or computer science • Very good knowledge on Linux kernel and kernel interfaces • Very good knowledge on hardware interfacing of FPGAs • Good knowledge in the programming of digital hardware • Experience in C++ programming of front-end servers • Good team worker and good English skills Más info: <http://goo.gl/gucgyb>

Electrical engineers (f/m) – RF-technology

Here at DESY, creative and motivated minds from home and abroad will find challenging and ambitious tasks in an international environment. Tasks: • Design, construction, installation and commissioning of RF-components (e.g. waveguides, klystrons, modulators, solid state amplifiers) • Specification of assembly-, installation- and RF-measurement instruments Requirements: • Degree in electrical or electronic engineering or physics • Very good knowledge in high frequency technology at high power (waveguides, klystrons, magnetrons and solid state amplifier) • Good knowledge of pulsed power technology (high voltage modulators, pulse transformers, semiconductor switches) • Good team worker and good English skills.
