Senior Technical Support Engineer

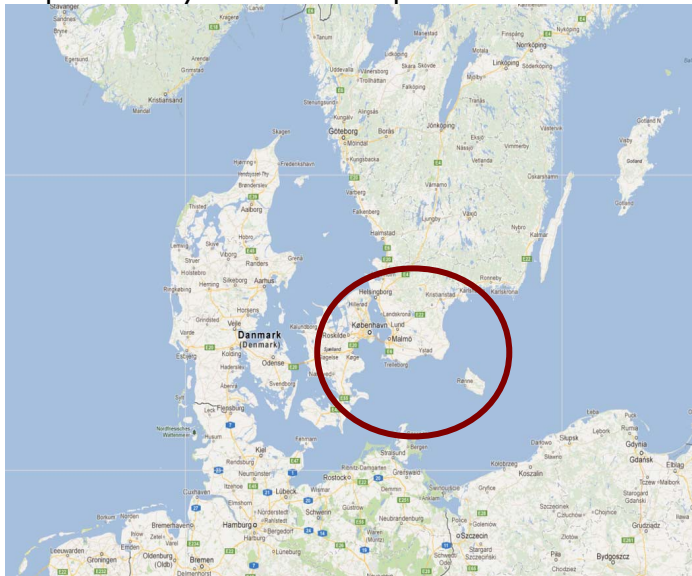

The Customer Support team is responsible for delivering the technical support to our partners and customers globally. The work tasks are very varied and require a very high standard of service and customer care as well as expert knowledge in TCP/IP-based networks and network security. The technical support is delivered through our web support systems, phone or onsite at the customer's location. The long term goal for this position is to be able to take a Professional Services role within the Professional Services team, working with larger and more complex projects and solutions often aimed to large enterprises and Telecom. The job might require international travels. <http://goo.gl/TOZbUV>

CAE Engineers with interest of automotive industry

We offer our customers product development services and we need to strengthen our team in Gothenburg Sweden with more skilled CAE engineers. Depending on your background and experiences, you will work as a consultant in different projects for our customers within automotive industry. The work could be performed from our office in Gothenburg or at the customers` facilities. Travelling within Sweden or abroad can be a part of the task. You will create and develop virtual CAE models and perform simulation and analysis. Most of the tasks require your participation in cross-functional development team, therefore you are responsible for the execution of your assignment accordingly and with best practice. <http://goo.gl/CcaaNv>
